

MS041B Advances and Applications in Meshfree, Particle, and Peridynamic Methods II

Main Organizer: Prof. Jiun-Shyan Chen (University of California, San Diego , United States)

Wed, 22/07/2026

09:45 - 11:15

[H4 - 1 \(Ludwig\)](#)

MS041B

Chaired by:

Prof. Zhen Chen (University of Missouri , United States) , Dr. Pablo Seleson (Oak Ridge National Laboratory , Virgin Islands, USA)

Scheduled presentations:

- **Keynote** [Consistency Issues and Their Resolution in Material Point Methods](#)
***D. Zhang**, K. Perez, J. Waters, P. Barlcay
- [Explicit material point method for fracture analysis of nearly incompressible materials involving large deformation](#)
***S. Zhang**, W. Yang, W. Sun, Y. Qiu, Y. Zheng
- [Extended B-spline-based Mixed Implicit Material Point Method in Solid Dynamics](#)
***R. Sugai**, K. Terada
- [Dynamic topology optimization of hyperelastic materials based on an adaptive total Lagrangian material point method](#)
***W. Yang**, S. Zhang, W. Sun, Y. Qiu, Y. Zheng
- [On Various Formulations of the Meshless Finite Difference Method](#)
***I. Jaworska**
